Dear ~~████████████████~~

It was nice to hear from you again. Naturally the Air Force is particularly interested in identifying any flying objects that appear in the air space over the United States or its possessions. I was interested in your description of these objects (whatever they may be) as observed by you on several occasions. Unfortunately, the detail in the photograph is so small that we may experience some difficulty in obtaining further information on the object. However, I wish to assure you that your photograph and report have been forwarded to the Commander, Air Technical Intelligence Center, Wright-Patterson Air Force Base, where it will be studied carefully and compared with other reports on unidentified flying objects received by the agency.

Again, let me repeat how pleasant it was to hear from you. Your continued support in matters of interest to the Air Force is deeply appreciated.

Sincerely,

1. A positive identification of the objects which appear in these three photo prints is not possible with the limited information furnished.
2. It is suggested that the negatives of these photographs be obtained from the sources if possible, and also that more details concerning the conditions under which the pictures were taken be given. Were pictures taken through a window glass? Inside a building? Were the inside lights on? Were they taken from an automobile?
3. The two photographs dated 26 Sep 60 show three images which cannot be explained from photo analysis. It is stated in the letter dated 29 Sep 60 that the diameter of these objects is about 15 meters and focused on infinity. The objects are out of focus which could mean either that they are very small and close to the camera or moving very rapidly. It is possible that either the negative or original print could be retouched since the intensity of the dark objects is much greater than the other dark areas on these prints.

Dear ~~████████████████~~

General Grant received your letter of 28 October upon his return from an extended trip to the Far East. Immediately thereafter it was necessary for him to depart for Great Britain where he is at the present time. Prior to leaving General Grant asked that I reply to your recent note and advise you that his schedule is such that it would be impossible for him to state when he might visit with you in San Diego. Furthermore, since the responsibility for investigating reports of unidentified flying objects is vested in the Air Technical Intelligence Center, he feels that it would be more appropriate to pass your request to the Center for further action. Accordingly, I have this date passed your letter to the Commander of the Center who has already received your original photograph as General Grant indicated in his letter of 19 October to you.

Again, on behalf of General Grant, let me express our appreciation for your continued interest in Air Force matters.

- g. West
- h. Northwest

31. If you are familiar with bearing terms (angular direction), try to estimate the number of degrees the object was from true North and also the number of degrees it was upward from the horizon (elevation).

31.1 When it first appeared:

- a. From true North \_\_\_\_\_ degrees
- b. From horizon \_\_\_\_\_ degrees

31.2 When it disappeared:

- a. From true North \_\_\_\_\_ degrees
- b. From horizon \_\_\_\_\_ degrees

22. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you first saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you last saw it.

23. In the following larger sketch place an "A" at the position the object was when you first saw it, and a "B" at its position when you last saw it. Refer to smaller sketch as an example of how to complete the larger sketch.
